

Playground Observation

When completing this observation, it is best to do it during or immediately after you supervise recess.

1. What are the students doing on the playground? Do you see problems or potential for problems? How can you help make it as safe as possible for students?
2. Are there any groups of students playing organized games or activities? If yes, what are they playing? Do you see any games that may cause issues? How can you help keep the games safe while allowing for free play? Are there any new games that you could help lead?
3. Do the students have playground equipment? Are they using it in the manner that it is intended? Do they need more? How can you help teach students how to use and manage equipment?
4. Anything else that you notice (positive or challenging) happening on the playground?
